

MARCO PECORARO

SAP EWM · TM · PP | Techno-Functional Consultant | SAP S/4HANA | Remote

Remote — based in Montreal, Quebec, Canada · On site for key project milestones · (514) 717-4314 · marco.m.pecoraro@gmail.com · [linkedin.com/in/marcopecoraro](https://www.linkedin.com/in/marcopecoraro)

PROFILE

SAP S/4HANA logistics consultant with six years in warehouse, transportation and production execution, certified by SAP in both Extended Warehouse Management and Transportation Management. Eleven implementations, rollouts and upgrades delivered end to end — requirement workshops and blueprint through configuration, RICEFW specifications, SIT/UAT, cutover, go-live and hypercare — across retail, pharmaceutical and distribution operations in Canada and Latin America.

Works fully remote and has delivered every project since 2023 that way, travelling on site only for key milestones such as design workshops, cutover and go-live. Comfortable owning a stream alone: runs the workshops and demos, writes the specifications, configures the system, drives the testing and stays on the defect queue after go-live. Fluent in English, French, Spanish and Italian. Seeking a remote EWM or TM engagement.

SAP CERTIFICATIONS & CREDENTIALS

- **SAP Certified Application Associate — Transportation Management in SAP S/4HANA** — SAP, 2023
- **SAP Certified Application Associate — Extended Warehouse Management with SAP S/4HANA** — SAP, 2022
- **Configuring SAP Business Network for Logistics** — SAP, 2025
- **The Internet of Things with SAP** — SAP, 2022
- **Lean Six Sigma Black Belt (ICBB)** — Management & Strategy Institute, 2019
- **Excel Business Intelligence: Power Query · Implementing Balanced Scorecards with KPIs** — LinkedIn Learning

CORE SKILLS

SAP EWM: Warehouse structure (supply chain units, storage types, sections, bins, activity areas, work centers) · warehouse process types · storage bin determination · putaway & stock removal strategies · warehouse order creation rules · POSC & LOSC storage control · handling units · transportation units · batch management & FEFO · replenishment · physical inventory · posting changes & ad-hoc movements · RF framework · PPF printing · MFS and warehouse automation · Advanced Returns Management · embedded, decentralized and Cloud Public Edition

SAP TM: SAP Best Practices activation · freight units & FU building rules · freight orders and bookings · transportation cockpit & planning profiles · carrier selection and tendering · charge management, freight agreements and freight settlement · transportation network master data · output management · TM-EWM integration · EDI monitoring

SAP PP / QM: Discrete manufacturing · production order types and order-type-dependent parameters · MRP and planned-order scheduling · MRP controllers · routings, work centers and capacity · production scheduling profiles · confirmations · settlement profiles · print control · inbound quality inspection, inspection lots and blocked stock

Integration: MM, SD, QM, FI and IM/WM integration points · master data alignment · IDoc/EDI · interfaces to automation and PLC layers · release upgrades and regression testing

Delivery: Requirement workshops · GAP and fit-to-standard analysis · blueprints and functional design · RICEFW functional and technical specifications · test plans, SIT and UAT · cutover planning · go-live and hypercare · key-user training and end-user manuals · Agile/Scrum, JIRA, Azure DevOps

Technical: ABAP (read/debug), SQL, Python, DAX · Power BI, Tableau, Qlik, Alteryx · Visio, Excel (advanced), Power Apps, Quickbase, SharePoint

Languages: English, French, Italian, Spanish — all fluent (Spanish used to deliver LATAM rollouts and training)

PROJECT EXPERIENCE

SAP EWM & QM on S/4HANA — Full-Cycle Implementation

Sep 2023 – Present

Lead EWM / QM consultant · Delivered remote · S/4HANA incl. first Feature Pack Stack (FPS01)

- Sole functional lead for the EWM and QM streams from project start through go-live and ongoing hypercare.
- Configured the complete warehouse structure — supply chain units, storage types and sections, storage bins and bin determination, activity areas, work centers — and the warehouse process types behind every movement.
- Built inbound and outbound execution end to end: goods receipt, putaway and stock removal strategies, warehouse order creation rules, packing, staging and goods issue, with POSC and LOSC storage control.
- Configured handling unit management, batch management and FEFO stock removal for shelf-life-controlled stock, plus replenishment strategies and physical inventory.
- Delivered the QM stream: inbound quality inspection, inspection lot processing and blocked/quality stock handling integrated with EWM putaway.
- Set up the RF framework transactions and PPF-driven printing used on the warehouse floor.

- Wrote the functional and technical (RICEFW) specifications and drove the build with ABAP developers through unit test.
- Ran system and user acceptance testing, led business demos and key-user training, and owned the defect queue through go-live and hypercare.

SAP PP — Discrete Manufacturing for Automated Pill-Packing Lines

Nov 2024 – Aug 2026

PP functional consultant · Pharmacy distribution network · Multi-plant, multiple robotic packing machines · S/4HANA

- Designed and configured Production Planning and Control in S/4HANA for automated pill-packing production across multiple plants and several robotic packing machine models.
- Created a custom non-valuated, non-inventory-managed material type with its screen sequences and work scheduling views to model production output that is not stock-relevant.
- Configured production order types and order-type-dependent parameters, order profiles, settlement profiles, MRP controllers, production supervisors, control keys and print control.
- Set up routings, work centers and capacity/scheduling parameters, production scheduling profiles for discrete manufacturing, and confirmation parameters.
- Configured MRP and planned-order scheduling, ran MRP and validated planning results with the production planners.
- Ran live demos and real-time troubleshooting with production and planning teams through testing, go-live and stabilization.
- Authored the full Production Planning configuration document used as the client reference for the solution.

SAP S/4HANA Cloud Public Edition — Warehouse Management

Nov 2025 – Mar 2026

Warehouse management consultant · Cloud Public Edition · Delivered remote

- Configured Warehouse Management in S/4HANA Cloud Public Edition, including storage control for Pick-Pack scenarios and handling unit management.
- Set up the warehouse organizational structure — storage types, sections, activity areas and work centers — and the warehouse master data supporting inbound and outbound processes.
- Worked fit-to-standard within cloud constraints, adapting business requirements to standard scope items rather than enhancements.

SAP S/4HANA Upgrade 1809 to 2023 — EWM Regression, Defect Resolution and Stabilization

2024 – 2025

Pharmacy distribution network · Highly customized EWM landscape driving automated picking equipment

- Member of the upgrade project team on a landscape carrying heavy Z-development and live automated picking equipment, where uninterrupted warehouse operations were the non-negotiable requirement.
- Defined and executed the EWM regression test scope across inbound, outbound, RF, printing, physical inventory and the custom objects driving the automation interface.
- Identified the defects raised by the release jump, analyzed root cause across configuration and custom code, and corrected them with the development team.
- All issues were closed out and the automated picking operation continued running post-cutover — the upgrade went live successfully.

SAP TM on S/4HANA 2023 with EWM Integration — SAP Best Practices Implementation

Sep 2023 – May 2024

SAP TM functional lead · Pharmacy distribution network · S/4HANA 2023

- Implemented SAP Best Practices for Transportation Management on S/4HANA 2023, from activation of the standard scope through to a production-ready solution.
- Delivered the full TM configuration: freight unit building rules, freight order and freight booking types, planning profiles and the transportation cockpit, carrier selection and tendering, charge management and freight settlement, and output management for transport documents.
- Built and loaded the complete TM master data set: transportation network (locations, zones, lanes, means of transport), carriers and business partners, freight agreements and rate tables.
- Configured the TM-EWM integration: transportation requirements from deliveries, transportation units in EWM, loading and unloading, door and staging assignment.
- Wrote the functional and technical specifications for the TM gaps and drove the developments with ABAP through build and unit test.
- Built the test scripts, ran integration testing across TM, EWM, MM and SD, trained the users and supported go-live.

SAP EWM on S/4HANA with MFS — A-Frame Automated Picking

Mar 2023 – Aug 2023

SAP functional analyst · Pharmaceutical distribution, warehouse automation

- Implemented SAP EWM on S/4HANA and integrated it with an A-Frame automated picking machine through the Material Flow System (MFS).
- Configured MFS communication points, conveyor segments, resources and telegram handling between EWM and the automation layer.
- Configured warehouse structure, inbound and outbound processing, transportation units, physical inventory, printing and RF.
- Produced blueprints, cutover plans, functional and technical specifications, process flows and master data requirements.
- Managed the project backlog in JIRA and ran the daily scrum; built and executed the test plans validating the solution against requirements.
- Provided issue resolution and daily queue monitoring after go-live.

SAP Advanced Returns Management on S/4HANA with EWM Integration

Mar 2023 – May 2023

Functional consultant · Pharmaceutical distribution · ARM / EWM / SD

- Implemented Advanced Returns Management on S/4HANA integrated with EWM for returns receipt and inspection.
- Configured returns order types, refund determination, inspection at goods receipt, follow-up activities and logistical follow-up.
- Aligned ARM with MM and SD credit and stock movement postings, tested end to end and documented the process for key users.

SAP EWM Rollout — Colombia Distribution Center

Aug 2022 – Jan 2023

Dollarama · SAP EWM business analyst · Second-largest retail warehouse in South America · S/4HANA

- Configured warehouse structure, warehouse process types, storage bin determination, putaway and stock removal strategies and warehouse order creation rules.
- Configured physical inventory, PPF printing, posting changes, ad-hoc movements, replenishment, and both POSC and LOSC.
- Wrote functional requirement documents, performed UAT, trained users in Spanish and resolved post-go-live issues.

SAP EWM Rollout — El Salvador International Warehouse

Feb 2022 – Jul 2022

Dollarama · SAP EWM business analyst · S/4HANA

- Configured the international warehouse structure and inbound, outbound and internal movement processes, including import-driven receiving flows.
- Supported testing, key-user training and post-go-live stabilization.

SAP EWM Rollout — El Salvador National Warehouse

Jan 2022 – Jun 2022

Dollarama · SAP EWM business analyst · S/4HANA

- Configured warehouse structure, storage bin determination, putaway and stock removal, replenishment and physical inventory for the national distribution warehouse.
- Consulted on the design and configuration of stock movements — inbound, outbound, replenishment and ad-hoc — and trained users on EWM and SAP ERP.

SAP TM Implementation — Sandoz Canada

Aug 2020 – Apr 2021

Kuehne+Nagel, assigned to Sandoz Canada · SAP TM analyst · Delivered with the Novartis global SAP team

- Contributed to the SAP TM implementation covering Sandoz Canada transport operations.
- Gathered user requirements and translated them into functional and technical specifications.
- Executed system testing and troubleshooting with the Novartis SAP team, and supported go-live.
- Trained forwarders on bidding for Sandoz transport needs, and trained both transporters and Sandoz employees on using the TM system.
- Wrote the complete end-user manuals for Sandoz and its transport providers.
- Monitored daily EDIs, executed routine IM transactions and maintained real-time stock visibility.

PROFESSIONAL EXPERIENCE

SAP Techno-Functional Consultant — EWM, TM, PP & QM

Mar 2023 – Present

Remote · Pharmacy distribution network (Famiprix) and further S/4HANA clients

- Owns the EWM, TM, PP and QM streams for a pharmacy distribution network across implementation, upgrade and support: the TM best-practices implementation, the PP solution for automated pill-packing, the MFS/A-Frame EWM integration and the 1809-to-2023 upgrade regression.
- Further S/4HANA work: a full-cycle EWM and QM implementation, and Warehouse Management on S/4HANA Cloud Public Edition.
- Manages JIRA tickets and the daily scrum, produces blueprints, cutover plans and functional/technical specifications, and runs daily queue monitoring and issue resolution.

Business Analyst, Logistics & Systems (SAP EWM) — Dollarama L.P.

May 2021 – Mar 2023

- Member of four S/4HANA EWM implementation teams for international distribution centers in Colombia, El Salvador and Guatemala.
- Managed KPI tracking for the international DCs in Power BI, built low-code data collection applications in Quickbase, wrote RFPs for warehouse equipment and delivered process improvement studies.

SAP Logistics Analyst (SAP TM & IM) — Kuehne+Nagel International AG

Aug 2020 – Apr 2021

- Assigned to the SAP TM implementation at Sandoz Canada; daily EDI monitoring, IM transactions, real-time stock visibility, and analytical support for operational modelling of transport and distribution networks.

Demand Planner — The ALDO Group

Nov 2019 – Aug 2020

- Managed demand planning for 20+ ALDO and Call It Spring partners across five regions.

EDUCATION & TRAINING

Bachelor of Commerce (BComm), Major in Supply Chain Management

2016 – 2019

Concordia University — John Molson School of Business, Montreal

- Capstone: developed a Python algorithm resolving bottlenecks in FedEx Supply Chain's automated conveyor system.
- SAP training (Udemy, 2021): Customizing SAP EWM · SAP EWM Project Training · SAP EWM Database Guide · SAP S/4HANA TM 2020 Functional.
